

**Fieldbus I/O module PROFIBUS-DP****12 digital pnp inputs****4 digital outputs 2 A****FLDP-IOM124-0002**

Type code	FLDP-IOM124-0002
Ident no.	6825348
<b>Operating / load voltage</b>	18...30 VDC < 200 mA
Operating current	
Configuration file	TRCKFF1D.gsd
<b>Fieldbus transmission rate</b>	9.6 kbps ... 12 Mbps
Fieldbus addressing	0 ... 99 (decimal) via two coded rotary switches
Diagnostics	Load voltage diagnostics, switched on/off via rotary switch
<b>Inputs</b>	
Number of channels	(12) 2/3-wire pnp sensors
Input voltage	18...30 VDC via operating voltage
Supply current	120 mA per port, short-circuit proof
Switching threshold	2 mA / 4 mA
Input delay	2.5 ms
Switching frequency	≤ 250 Hz
Max. input current	7 mA
Electrical isolation	galvanic isolation against the bus
<b>Outputs</b>	
Number of channels	(4) DC actuators
Output voltage	18...30 VDC from load voltage
Output current per channel	2.0 A, short-circuit proof
Load type	resistive, inductive, lamp load
Switching frequency	≤ 250 Hz
Simultaneity factor	1
Electrical isolation	galvanic isolation against the bus
<b>Electrical isolation</b>	to operating and load voltage
<b>Dimensions (W x L x H)</b>	60.4x197x27mm
Housing material	fibre-glass reinforced Polyamide (PA6-GF30)
halogen-free	yes
Mounting	4 mounting holes Ø 5.4 mm
Operating temperature	0...+55 °C
Storage temperature	-25 ... +70 °C
Vibration test	as per EN 60068-2-6
Shock test	as per EN 60068-2-27
Electro-magnetic compatibility	according to EN 61000-6-2/EN 61000-6-4
Protection class	IP67
Approvals	CE, cULus
UL conditions	pol. deg.2, env. temp. max. 40 °C, cl.2 ps req.

- Two inputs or outputs per connector
- For robot applications
- Robust electromechanics
- High magnetic field immunity
- Intelligent terminating resistor
- Module-related diagnostics
- IP20 terminal connection
- Fibre-glass reinforced housing
- Shock and vibration tested
- Encapsulated module electronics
- Metal connector
- Degree of protection IP67

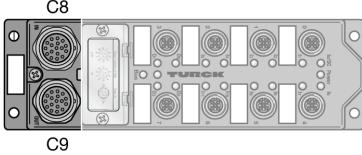

**Functional principle**

The FLDP-IOM124-0002 is a compact fieldbus I/O module for PROFIBUS-DP and was especially designed for robotic systems resp. automatic tool changers. The module is available in degree of protection IP67 and features 12 digital pnp inputs and 4 digital 2A outputs.

PROFIBUS and power supply are jointly connected via a multibus cable with M23 connection technology which was especially developed for robotic applications. The module also features a 13-pole IP20 terminal on the bottom side. Via this electromechanical link, additional analog signals like those of the current stabilizer are supplied to the multibus cable (quasi-parallel wiring).

Due to the target application, the module also features an intelligent terminating resistor. The terminating resistor is automatically connected if the roboter module is the last slave at the PROFIBUS branch. Once a further PROFIBUS slave is added, the terminating resistor is automatically disconnected. Automatic connection of the internal terminating resistor is always carried out, if pin 15 and 16 of the M23 coupling (OUT) are not short-circuited.

The diagnostic message of the load voltage can be activated or deactivated via GSD parameterization or the integrated coded rotary switch.
