**TOTAL EUR 2.955,60+IVA
TRANSPORT EUR 250,00+IVA**

N.B.: About the mechanical dynamometer ref. 90204N has been replaced by digital electronic model M50 (allego technical specification).

This is because reading with the mechanical model is staggered and depends on the position that hooked the brush pressure. As it is a measure that is normally performed on installed engines, then with very limited access space, was created a new digital dynamometer equipped with easy-to-use probe.

**If the customer is concerned are also available two optional for digital dynamometer:
-Spare-Probe Calibration System with sample weight 2 kg.**
